June 28, 2011

To: Moses Lake Property Owners/Residents/Business Owners

Moses Lake Irrigation & Rehabilitation District (**MLIRD**) has been very active in the past four years bringing the lake and Connelly Park up to appropriate standards. While much has been accomplished in the area of beautification, and greater public usage, it is time to continue the treatment process to the lake body itself. With the management tools in place we have the ability to continue with the process. This treatment procedure has been and is an interagency effort.

MLIRD has contracted Lakeland Restoration Services, LLC to perform herbicide treatments in the continued effort to control **riparian** invasive nuisance plants from Moses Lake. The treatment will occur during the weeks of July 11th-22nd with a target start date of July 11, 2011.

The permitting process and notification system of the State of Washington is being followed with the enclosed notification.

The following precautions are to be followed, especially for those that may be sensitive to herbicides:

- **If you are using the lake itself as a potable and/or irrigation water source, please contact Lakeland Restoration Services, LLC to determine if any restrictions apply.**

Details of treatment time and the end of use restrictions will be announced at www.lakelandrs.com. **There is NO restriction for swimming, fishing, livestock watering, or non-consumptive domestic uses.** If you have any questions, please refer to the website above, or contact the applicator directly at (877) 273-6674.

We appreciate your support in helping to make this project a success!

Sincerely,

A handwritten signature in blue ink, appearing to read 'Curt J. Carpenter', is written over a horizontal line.

Curt J. Carpenter, LA General Manager

Herbicide Treatment

Business and Residential Notice

Distribution Date: June 28, 2011

Moses Lake will be treated with the aquatic herbicide(s)/algaecide(s) on/or between July 11th and July 22nd.

Product(s) planned for use:

Habitat[®] or Polaris[®] (Active Ingredient: Isopropylamine salt of Imazapyr (2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-3-pyridinecarboxylic acid)

Glyphosate-“Rodeo”-brand name-Active Ingredient:* Glyphosate, N-(phosphonomethyl)glycine, in the form of its isopropylamine salt.

Location of Treatment(s): Specific sites on Moses Lake.

Treated and potentially affected areas will be sign posted prior to or the day of application. The signs will describe any water use restrictions or advisories.

If you are withdrawing water for potable or domestic water use, livestock watering, or irrigation, and have no alternate water source, please contact the applicator Lakeland Restoration Services, LLC at (877) 273-6674 or info@lakelandrs.com to arrange an alternate water supply.

If you would like to request additional notification prior to treatment, or have further questions, please contact me using the information above.

This herbicide treatment is regulated under a permit issued by the Washington State Department of Ecology (Permit #WAG994180).
