---

August 23, 2019

To: Property Owners/Residents/Business Owners

Lakeland Restoration Services, LLC will perform an herbicide treatment to control aquatic Eurasian watermilfoil, yellow flag iris, and fragrant water-lily on Diamond Lake. **The treatment will occur on September 4<sup>th</sup>, 2019.** The permitting process and notification system of the State of Washington is being followed with the enclosed notification.

**In order to help prevent fragmentation, please DO NOT cut, rake, or hand-pull plants prior to treatment.**

**Products planned for aquatic use:** Triclopyr, 2,4-D, Imazapyr, and Glyphosate

The following precautions are to be followed, especially for those that may be sensitive to herbicides:

**Swimming Restrictions:** It has been advised that no swimming occur within the treated area(s) during or for 24 hours following treatment.

**Drinking Water Restrictions:** Do not use water from treatment area until an approved assay result is below 70ppb of 2,4-D or for 21 days.

**Irrigation Restrictions Turf and Landscape Ornamentals:** Do not use water from treatment area until an approved assay result is below 100ppb of 2,4-D or for 21 days.

**Irrigation Restrictions Food Crops and Production Ornamentals:** Do not use water from treatment area until an approved assay result is below 100ppb of 2,4-D or for 21 days .

**Stock Water Restrictions:** Do not use water from treatment area for 1 day.

**There is NO restriction for fishing.**

Details of treatment time and the end of use restrictions will be announced at (877) 273-6674 or [www.lakelandrs.com](http://www.lakelandrs.com). To access information from the website on this project, go to the bulletin board, click projects, and finally click Diamond Lake.

**This application will involve the use of airboats. Please remove items from docks such as lawn chairs, flower pots, personal/recreational flotation devices, etc.**

Sincerely,

David Kluttz, Managing Member

**Herbicide Treatment  
Business and Residential Notice  
In ¼ Mile Notification Area**

**Distribution Date: August 23, 2019**

Diamond Lake will be treated with the aquatic herbicides on **September 4<sup>th</sup>, 2019.**

**Products planned for aquatic use:** Triclopyr, 2,4-D, Imazapyr, and Glyphosate

**Active ingredients:** (Triclopyr,[3,5,6-trichloro-2-pyridinyloxyacetic acid, triethylamine salt]), (2,4-Dichlorophenoxyacetic acid, dimethylamine salt), (Imazapyr [Isopropylamine salt of imazapyr]), (Glyphosate [N-(Phosphonomethyl)glycine, Isopropylamine salt])

Location of Treatments: Specific spot treatment sites on Diamond Lake

**Plants/Algae targeted:** Eurasian watermilfoil, yellow flag iris, and fragrant water-lily to improve the water quality on Diamond Lake

The applicator will post signs in the treated and potentially affected areas no more than 48 hours prior to treatment. The signs will describe any water use restrictions or advisories.

If you are withdrawing water for potable or domestic water use, livestock watering, or irrigation, and have no alternate water source, please contact Lakeland Restoration Services at **877-273-6674** or **lakeland@lakelandrs.com** to arrange an alternate water supply.

If you want additional notification prior to treatment, or have further questions, please contact me using the information above.

**This herbicide treatment is regulated under a permit issued by the Washington State Department of Ecology; Permit # WAG994130.**
