To: Waterfront Property Owners
From: Lakeland Restoration Services LLC
RE: **Aquatic Plant Treatment**

Lakeland Restoration Services will be conducting aquatic plant control to provide safe swimming and boating in Diamond Lake, WA on September 4th, 2019.

The Friends of Diamond Lake will be sponsoring the control of Eurasian watermilfoil and Yellow Flag Iris. If you have other nuisance plants we can provide a service to homeowners.

It is imperative that all interested homeowners fill out this form and mail it in with payment to ensure a timely service. Checks will not be deposited until the treatment is performed.

We will not be accepting verbal or last minute authorizations as we must plan ahead to provide an effective service to all customers.

It is very important that all interested homeowners and business owners send the attached pre-authorized form with payment upon receiving this notice.

Please share this information with neighbors. Weed control can be more effective treating larger areas and neighborhoods.

This form will be available on our website. Please go to www.lakelandrs.com to print.

We look forward to working with you and appreciate your support in improving water quality.

Sincerely

David Kluttz
Managing Member
